Short 7		Permanent	Tune-Up Procedure
Short 7	Γerm	Permanent	Schematics
Short 7			Test Setup Photos
Short 7	l'erm	Permanent*	User's Manual

Neato has spent substantial effort in developing this product and it is one of the first of its kind in industry. Having the subject information easily available to "competition" would negate the advantage they have achieved by developing this product. Not protecting the details of the design will result in financial hardship.

Permanent Confidentiality:

The applicant requests the exhibits listed above as permanently confidential be permanently withheld from public review due to materials that contain trade secrets and proprietary information not customarily released to the public.

The applicant understands that until such time that Innovation Science and Economic Development Canada distinguishes between Short Term and Permanent Confidentiality, either type of marked exhibit above will simply be marked Confidential when submitted to ISED.

Sincerely,

By:

DIRECTOR OF SOFTUME

Pawel Orzechowsk

² - Must be signed by applicant contact given for applicant on the FCC site, or by the authorized agent if an appropriate

authorized agent letter has been provided. Letters should be placed on appropriate letterhead.

The asterisked items (*) require further justification before permanent confidentiality will be allowed. These also currently require review by the FCC under their Permit-But-Ask policy before the grant is issued and can delay completion of an application. Further justification should be added to the note above. One such example for a potted device would be: "The EUT is FULLY potted using a non-removable epoxy based material. Removal of potting material causes irreparable damage to internal circuitry. See photographs exhibits that outline the device before and after potting."
